

## Fluidized Lime K 100

<b>Application:</b>	Desulfurization of hot metal Desulfurization of steel For monoinjection and coinjection with Magnesium
<b>Composition:</b>	CaO > 94 % L.O.I. max. 3 %  Additives for increased efficiency. Fluidizing reagents.
<b>Granulation:</b>	> 0,09 mm max. 5 % > 0,125 mm 0 %
<b>Bulk Density:</b>	Approx. 900 kg/m <sup>3</sup>
<b>Special Properties:</b>	Excellent flowability. A special coating guarantees the lime's flowability for a period of min. 3 months.
<b>Packing:</b>	silos, tanker, flow bins
